*Allowable Subject Matter*

Claims 1-15 are allowed.

The following is an examiner's statement of reasons for allowance:

In reference to claim 1, Bowers teaches a method comprising the steps of:

providing a semiconductor membrane having an insulating substrate (Abs. Lines: 1-5

Fig.2 (12));

attaching a metallic interlayer to a second side of the membrane first side of the semiconductor membrane (Abs. Lines: 1-5 and Fig.2 (20));

attaching a thermally conducting substrate to a second side of the membrane (Col.4, lines: 5-25 and Fig.2 (10));

removing the insulating substrate from the first side of the semiconductor membrane (Col.4, lines: 10-15); and

placing a metal layer on the first side of the membrane (Col.7, lines: 40-50).

However, Bowers fails to teach applicant's further limitation of cleaving with a laser.

It would not have been obvious to one of ordinary skill in the art to modify Bower's teachings to include a laser cleaving step as claimed by applicant because Bowers teaches that the high temperature treatment is advantageous to allow for fusion which forms a physical barrier to desorption of N while allowing smaller hydrogen atoms to escape (Col.8, lines: 50-60). Laser cleaving would result in only slight increases in temperature. Consequently, applicant's claim language is not anticipated by prior art and deemed to be allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
